

Re: Sample 1 and Sample 2 will have the same analysis date and cut off date

Dear Participant

Please note that for the following programmes, sample 1 and sample 2 will have the same analysis date and cut off date:

Blood Gas
Immunoassay
Lipids
Human Urine

Sample Number	Thistle analysis date	Thistle Final Cut-off
1	14 January 2008	18 January 2008
2	14 January 2008	18 January 2008
3	28 January 2008	1 February 2008

This is not an error on Thistle's side, but we have done this to ensure all participants get their samples in time to analyse. We do not want to send the samples too early in the year due to people being on leave.

Kind regards

Marlize Albertse
